SUMMARY

Results-driven **Android Developer and Project Manager** with **4+ years** of experience in developing and managing high-quality mobile applications and leading cross-functional teams to deliver projects on time. Proficient in Kotlin, Java, and modern Android frameworks, with expertise in project management methodologies such as Agile and Scrum.

EDUCATION

BS Computer Science

COMSATS University Sahiwal | 2013-2017

EXPERIENCE

Android Developer - *Rocco Video*

Mar, 2023 – Present

Led the development of multiple web & mobile applications from concept to deployment.

- **Rocco Video:** Pakistan's first short video and live streaming mobile app with 500k+ downloads on Play Store.
- **Jokerz:** A short video and live streaming mobile app.
- **GrowUp Pakistan:** Lead the development of a blogging platform.
- **Gold Bazaar:** I developed an eCommerce android app specifically for buying and selling gold products online.
- **Digital Dealz:** A platform for buying and selling digital accounts like TikTok, YouTube, Instagram, Google Play Console and more, with detailed account listing forms and a wallet system for secure transactions.

Android Developer - *Amigo Software Limited*

Feb 2022 – Mar 2023

- **Smart Salem (UAE Based Project):** Worked on client requirements and delivered a multi-threaded application with three core modules: Smart Manager, Smart Table, and Smart Kitchen. Utilized Volley for efficient data parsing and ensured smooth multi-tenancy architecture.

Android Developer - *TecJaunt*

April 2019 – Feb 2022

Developed comprehensive project plans and actively participated in the entire product lifecycle, from design and development to successful deployment of the following apps:

- GPS Navigation
- GPS Camera
- Flashlight
- Volume Booster
- Qibla Finder
- Gallery App

Android Developer - *O2SOFT*

Dec 2017 – Oct 2018

- **Prayer Time:** Implemented the prayer time mobile application using open source libraries, like Compass, sensor and Geolocation library etc.
- **Cosmetic App:** Implemented frontend and backend of a USA based client app used for managing cosmetic stores.
- **Big of Scooter:** Developed an online bike booking android app.

OTHER PROJECTS

BrightBench

I contributed to the frontend and backend development of BrightBench, a student portfolio application designed to provide students with access to lectures, assignments, timetables, and a newsfeed, all managed by teachers and admins. The app also includes a comprehensive admin panel for content management and user administration.

CIIT Entrance App

I developed a student entry system where students scan a QR code using a security device. Upon scanning, the student's complete information is instantly displayed on the security guard's device screen for verification.

Conversational Survey App

Designed to conduct surveys with seamless data submission to Firebase. The app includes robust admin functionalities, allowing the admin to:

- Upload and manage surveys to be conducted.
- View user details and individual survey responses.
- Access comprehensive statistics and aggregated user responses for each survey question.

Bakkerij Dellafaille

I contributed to the design and development of key modules for Bakkerij Dellafaille food app, improving functionality and user experience. The app allows users to browse menus, place orders, and access various food-related services with an user-friendly interface.

SKILLS

Languages & Frameworks: Kotlin, Java, MVVM, Jetpack Compose

Tools & Technologies: Android Studio, Git, Firebase, Postman, JIRA, Asana, Lark

Databases: SQLite, Room, CoreData, Firebase Realtime Database, MySQL

Others: UI/UX Best Practices, Performance Optimization, Third-Party Library Integration
